

The Challenge

A grants management solution that would find relevant grant opportunities and be a viable grant-seeking resource for Flintridge Center's management support services for local nonprofit organizations.

The Solution

Grants Network: Research annual subscription and additional KnowledgeBase user licenses for local nonprofit organizations.

The Results

Expanded management support services, saved time, and up-to-date grant opportunity information.

The CBO: Flintridge Center

Flintridge Center is a community-based organization (CBO) that addresses issues of disparity that affect community well-being, particularly those that impact the lives and futures of young people in Northwest Pasadena and Altadena, California.

Flintridge Center strives to create a healthy, safe community where families thrive, youth reach their full potential, and equality and opportunity are accessible to all through initiating and supporting community partnerships, leveraging resources to strengthen nonprofit partners, and providing space for creative collaboration.

The Challenge: Finding Relevant Grant Opportunities

Flintridge Center was looking for a solution that would help them find relevant grant opportunities for their management support services that they offer to local nonprofits in both Pasadena and Altadena. They wanted a solution that would prove to be a viable grant-seeking resource that would help them and other local nonprofits save time in the grant process and provide up-to-date information about available grant opportunities.

The Solution: Grants Opportunity Support

Flintridge Center was familiar with eCivis' Grants Network as they had been piggybacking on the City of Pasadena's Grants Network city license subscription as a CBO, which made it the natural choice for Flintridge Center to choose eCivis as their grants management solution of choice.

Flintridge Center purchased Grants Network: Research and additional KnowledgeBase user licenses for their local nonprofit users.

The Results: Support, Time Saved, Up-To-Date Information

Flintridge Center has seen significant benefits, including expanded management support services, saved time, and up-to-date grant opportunity information since the purchase of their eCivis Grants Network subscription. According to Karen Gerst, who handles Communications & Grants Management for Flintridge Center, "It makes grant-seeking research so easy ... eCivis has been a great timesaver, providing up-to-date information about federal and other grant opportunities in an easy-to-use platform. It takes away the burden of researching grants."
